

# Computer Science Industry Seminar Series 2021

## MOBILE DEVELOPMENT CODING BOOTCAMP

- Trends in Cross-Platform App Development

in collaboration with Barone, Budge and Dominick (BBB)

**24 AUG**  
TUESDAY

14h10 to 16h45

**Understanding the  
environment**

**25 AUG**  
WEDNESDAY

13h15 to 14h00

**State Management**

**26 AUG**  
THURSDAY

10h30 to 12h00

**Reacting to Data**

### Facilitators /Instructors

 **Nhlanhla Lucky Nkosi** is a Software Engineer in BBD's dedicated Research and Development unit (ATC) whose responsibilities include facilitating learning for all engineers at BBD, and a technical lecturer at Wits University. Lucky holds degrees in Game Design and Information Engineering, and has experience in building and maintaining enterprise banking software with a vast range of technologies from VB6 and C# through to the modern web-technologies which lie at the core of his current technical speciality and passion. Lucky hones this love for the web by also being a co-organiser of JoziJS.

 **Rudolph Esterhuysen** has almost two decades' worth of experience in the IT industry, primarily focussed on Java development. He has worked on project teams for large enterprises as well as more modest SMEs, and enjoys the different challenges the life of a software builder has to offer. Always looking for new and exciting things to learn, he enjoys playing with many languages and tools. Rudolph is an AWS Certified Solutions Architect and uses this skill to help drive cloud-focused initiatives across BBD.

 **Thabang Ledwaba** is a Computer Science and Informatics graduate from UJ (2014). He has been involved in projects across multiple industries including financial services, insurance and telecommunications as both a software engineer and team lead. He is currently part of the Research and Development unit within BBD.

 **Malusi Mqadi** is a UKZN alumnus who completed his BSc in Computer Science and Information Technology degree in 2018 and his Honours degree in Computer Science in 2020. Having worked as a tutor and lab demonstrator for the UKZN for the School of Mathematics, Statistics and Computer Science, he discovered his love for igniting the passion for coding in others. Malusi is currently a Junior Software Engineer at BBD, and is passionate about software engineering and partaking in hackathons.
